

Add new revenue with electronic bill presentment and payment

Serve billers large and small through a single flexible platform.

The option to receive digital payments is essential for most companies. Yet few businesses want to manage a separate system, vendor or financial institution for each payment type.

Provide your corporate billers with a powerful, all-in-one electronic bill presentment and payment (EBPP) solution. Deluxe hosts and manages this flexible, digital payment platform so you have the key features today's billers and payees expect—without any of the technical hassles.

Your financial institution gains:

- » Scalability to meet the needs of any size business customer
- » Branding tailored to your business customer's needs
- » Critical support for deposit-rich verticals
- » Expansion of lockbox, remote deposit capture or integrated receivables capabilities

Create the ideal bill pay experience

Your billers can gain an outstanding online payment experience with Deluxe eBill+. It's ideal for digital payments to utilities, property managers, healthcare providers, insurance companies, professional services firms, municipalities, loan servicers and even non-profit organizations that need an engine for online donations.

Working with Deluxe helps ensure your clients have access to the latest digital payment innovations and security, including mobile-responsive design that works seamlessly from any browser or smart device, ADA compliance, rigorous security and robust compliance features that let payers transact with confidence. Billers get up and running quickly with seamless hosting from Deluxe. API access, single sign-on and custom integration are available for more sophisticated billers.

+ **76%** of bill payments made through corporate sites vs. online banking.¹

Up to **5 Days Faster**
Billers receive money quicker with digital payments compared to checks.²

+ **63%** of young consumers (age 18–34) use mobile devices to pay bills.³

Benefits to you

Generate new revenue

Receiving digital payments is something businesses are willing to pay extra for. It's a great tool for deepening relationships with valuable customers, attracting new customers and creating new, ongoing revenue streams.

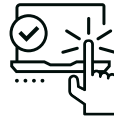

Speed posting and reconciliation

All payments include the payer's account or invoice number to maximize accuracy and straight-through processing making it simple to post and reconcile online receivables. There's no need to rekey data or hunt down missing information with daily deposit reports and custom-formatted files.

Manage a single vendor

Who needs more vendors or channels to manage? Deluxe can power all the receivables needs of your business customers or departments within your FI. Choose eBill+ as a standalone application, or integrate it with your lockbox, remote deposit capture or integrated receivables for an end-to-end solution.

Empower your billers

From start to finish, your billers get the choice and control they want. It's easy to match each biller's brand identity, accept their preferred payment methods (including ACH, debit card and credit card), and accommodate both one-time and recurring payments from registered users. Your biller's back office and customer service teams have fast access to information through numerous built-in reports and intuitive search functions.

Streamline security and compliance

Be confident that the highest standards for data security and payment processing, including PCI, HIPAA, SSAE 16 and SOC 2 are met with Deluxe eBill+. The biller sites are also ADA-compliant.

For more information on eBill+, contact your Deluxe sales representative.
