

# Remote Lockbox

Lockbox Supplement

## A convenient and cost-effective addition to traditional lockbox operations

As the payments landscape evolves, businesses and financial institutions need creative and efficient ways to manage customer receivables. By adding Deluxe's Remote Lockbox solution to a traditional lockbox operation, your business customers get the combined flexibility of remote check capture with a full-service lockbox.

They'll enjoy increased payment processing flexibility and improved payment processing capacity by combining Remote Lockbox with our traditional lockbox solution.

Remote Lockbox helps make check processing efficient and convenient for your business customers. They can use a desktop scanner to capture check payments and associated remittances received at locations outside of their lockbox PO Box, then transmit those images to Deluxe. Our nationwide lockbox network provides full-service processing that meets each customer's specific needs.

Their payment processing costs are also reduced since they can avoid having to ship extra payments to the lockbox overnight.

### Configure Remote Lockbox to your needs

Remote Lockbox puts choice in your hands:

- Receive payments at their local office, in the field, their current PO Box or existing lockbox address
- Use intuitive, driverless, compatible network scanners or the hardware of their choice
- Fully compatible with Deluxe's Mobile RDC application
- Handle account validation, data entry and exceptions at point of capture

By combining Deluxe Remote Lockbox and Lockbox, you can see exceptions and reporting in one convenient place.

An overnight shipment to a PO Box can cost businesses more than \$20\* per parcel.

Maximize staff productivity and increase visibility with the combined capabilities of Remote Lockbox and Lockbox. Tailor implementation with 10-year archiving, research and reporting tools, intraday decisioning or custom keying services. Remote Lockbox is fast, equipped with the latest technology and automatically links with Deluxe's Receivables 360+ solution to automate and consolidate paper and electronic receivables.
