

# Deluxe's High Security checks help businesses stay protected

As the industry leader in checks, Deluxe is constantly working to stay a step ahead of criminals. The most secure check available comes with features that will help businesses and banks more easily identify the validity of a check when it is presented as payment.

### High-Security Background Colors

Copiers and scanners cannot duplicate these green, burgundy, blue, yellow, or purple background colors.

### Thermochromic Red Ink

Ink reacts to heat to deter and detect copying. Holding between thumb and forefinger, the ink will disappear on a legitimate check, validating its authenticity.

### Anti-Copy Technology

Makes check very difficult to reproduce on the majority of today's copiers.

### Foil Hologram

Multi-colored, dimensional foil includes **embedded security features** and cannot be reproduced by copiers or scanners.

### True Watermark

Watermark pressed into paper can be seen by holding the check up to a light source but cannot be reproduced by copiers or scanners.

### Mobile/Remote Deposit Reminder

Track and date deposits made via mobile device to prevent depositing checks twice.

### Chemical-Wash Detection Area

Chemical alteration attempts result in speckling or stains in this lock area.

### Original Document Backer

Original document screening deters cut-and-paste alteration attempts.

### Also includes these security features:

- Chemical-sensitive paper
- Visible fibers
- Warning border
- Consecutive numbering
- Toner adhesion
- High-resolution border elements
- Invisible fluorescent fibers
- Padlock icon
- Colored pantograph background
- Microprinted borders
- Security warning box design

**Businesses understand the value of using checks but, under certain circumstances, keeping copies of checks could be risky.**

Keeping copies of original checks or having checks that can be copied is a risk that a business should not take. If just one check falls into the wrong hands, multiple false checks can be created and used to commit fraud.

**Based on the industry's best practices, Deluxe recommends that businesses enhance the security of check-related records. Here are some ways to safely keep records of checks:**

- Use duplicate (or triplicate) High Security checks, which are available from Deluxe. The duplicates provide a great way to keep a record of the payment on duplicate paper that cannot be used to process a payment transaction. A photocopy of a check could be mistakenly perceived as a legitimate document.
- When printing the original laser check, set the copier to print twice: once on check stock/paper and once on white copy paper. Some printers allow the user to place white paper in a second drawer to make the duplicate. Stamp the copy with a void stamp. (If the copier doesn't have a second drawer, insert the checks into the printer with a blank sheet of paper between each check then set the printer to print twice.
